John Burn Speaks At Lions Club

John Burn of the Las Vegas Employment Agency told the Lions Club here that this section of the country is thirty years behind in industrial development.

"Millions of dollars have been taken from our mines to build cities in other states leaving little for research or development within our own state boundaries. Out of the wealth secured in this state, few of our towns enjoy heavy residential retirement from those who have profited from our mining industry. Therefore, we must face the fact as individuals and groups to bring about sound economy within our state boundary."
